```java
package com.sailaja.Assignments;

public class AccessSpecifier {
public int flag;// Public Scope
private int data = 80;
private void msg() {// Private Access Modifier
System.out.println("Private Scope.");
}
public static void main(String[] args) {

AccessSpecifier obj=new AccessSpecifier();
    System.out.println(obj.data);
obj.msg();
new Other().func();
}
protected void func() {// Protected Scope
System.out.println("Protected Scope");
}
void met() {// Package Scope
System.out.println("Package Scope.");
}
}
class Other{
void func() {
AccessSpecifier ref=new AccessSpecifier();
ref.flag=80;
ref.met();
ref.func();
}
}
```
